

Activity 7

NeDL Transition Academy

- Programming Activity 7: Types.

.NET support many types of things. In this activity you need to document the use of each type of things. When you would use it. And how it compares to other types.

Step 1: Compare and contrast the difference between Class, Interface, and Struct. Create code samples showing the differences in how they are used.

Class

Interface

Struct

Step 2: Reference types vs value types. What is the difference between reference types and value types in C#. Create a code sample showing the difference between a value type and a reference type.
